PROJECTS

1. **MARTIALverse (Martial arts teaching website) | MEAN stack**

   Live site │ github client site │ github server site

   ● Here are different types of martial arts learning classes.
   ● An instructor can add a new class to the website with admin approval. Admin can deny instructor's request to add any classes.
   ● Students can join the class of their choice by paying for it.
   Technology : React.js , Express.js, Firebase, Tanstack Quary, MongoDB, Axios, Stripe and others

2. **Kitty Krazy (Toys shopping website) | MEAN stack**

   Live site │ github client site │ github server site

   ● On this website, people get different types of toys for their kids.
   ● Here people prefer different types of toys for children and pay for those toys. Once payment has been made, the toy is delivered to the customer.
   ● The website owner can add new toys. He/She can update the price and quantity of old toys and delete them if not required.
   Technology : React.js, Tailwind, MongoDb, Express.js, Firebase, react-router-dom and others

3. **Kitchenise (Food recipes website) | MEAN stack**

   Live site │ github client site │ github server site

   ● On this website, people get recipes for different types of food.
   ● Here are many popular chef's recipes that people use to get a feel for the delicious food.
   ● Website users can give valuable feedback. On that feedback, the recipes are updated accordingly.
   Technology : React.js , Express.js, Firebase, react-router-dom, Bootstrap and others
